PRODUCTION PROCESS FLOW

1. Raw Material Selection

Hexabriquettes from this factory is made from the selective materials. It made from Hardwood and Sawdust for perfect quality. Hardwood will be burn to form Hardwood charcoal before it blends with sawdust

2. Material Formation

Second process is blend the Hardwood charcoal with sawdust using Moulding machine and mix with some organic material to make it easier to shape into certain size

3. Material Shapping

After the material blend with specific composition, the charcoal dough will be shaped with certain size as needed.

PRODUCTION PROCESS FLOW

4. Drying Dough

After shapping the dough,it will be dried in the sun for a while to reduce the amount of water within before going through the oven process.

5. Material Drying by Oven

The next step is put the shaped dough in the oven with certain temperature to evaporate and dry the dough, so it can be form as Hexa Charcoal

6. Quality Control

The process ovenis done, it will take out from the oven and put in fresh area to avoid re sparks after the processing before packaging process. Check the quality and sort the charcoal based on the quality

PRODUCTION PROCESS FLOW

7. Packaging and Weighing

sorting, weighing and packing based on product request

8. Storing

After the quality control process, the goods will be sealed and stored in the warehouse before they are ready to be loaded into containers
